

SAULT COLLEGE OF APPLIED ARTS AND TECHNOLOGY

SAULT STE. MARIE, ONTARIO

Sault College

COURSE OUTLINE

COURSE TITLE: Instrumentation 1

CODE NO. : ELR622

LEVEL: BASIC

PROGRAM: Construction & Maintenance Electrician Apprenticeship
(6520)

AUTHOR: Bill Armstrong

DATE: Sept. 2008

PREVIOUS OUTLINE DATED: Sept. 2007

APPROVED:

“Corey Meunier”

CHAIR

DATE

TOTAL CREDITS: 3

PREREQUISITE(S): N/A

HOURS/WEEK: 3

I. COURSE DESCRIPTION:

This course introduces the student to the principles of Instrumentation and Process Control. The measurement of process variables such as temperature and pressure will be studied in detail and applied in the practical component of the course.

II. LEARNING OUTCOMES AND ELEMENTS OF THE PERFORMANCE:

Upon successful completion of this course, the student will demonstrate the ability to:

1. *Describe Instrumentation and Process Control and understand Related terminology.*

Potential Elements of the Performance:

- Explain what Instrumentation is.
- Explain what Process Control is.
- Describe the major components of a process control loop.
- Draw the block diagram of a process control loop.
- Understand instrumentation units, symbols and terminology.(I.S.A.)

2. *Understand temperature measurement, devices and applications.*

Potential Elements of the Performance:

- Understand the difference between temperature and heat.
- Convert from one temperature scale to another.
- Describe the physical and operating characteristics of filled system thermometers, thermocouples, resistance temperature detectors and thermistors.
- Calibrate and explain the operation of thermocouple and RTD transmitters
- Describe methods of measuring temperature.
- Select, install and calibrate temperature measurement devices

3. ***Understand pressure measurement, devices and applications.***

Potential Elements of the Performance:

- Define the term fluids and fluid mechanics
- Derive units of force, energy and pressure in SI and English units
- Perform unit conversions and calculations
- Define the term density, weight density and specific gravity
- Derive the relationship between mass density and weight density
- Express pressure as equivalent liquid column
- Differentiate between gauge, absolute and vacuum pressure
- Describe methods of measuring pressure
- Select install and calibrate pressure measurement devices

III. TOPICS:

1. Introduction and overview
2. Temperature measurement and applications
3. Pressure measurement and applications

IV. REQUIRED RESOURCES/TEXTS/MATERIALS:

Lab Volt Process Control Training Manuals

V. EVALUATION PROCESS/GRADING SYSTEM:

The final grade will be derived as follows:

Two theory tests and quizzes	60%
One practical test and lab reports	30%
Attendance and work ethics	<u>10%</u>
TOTAL	100%

The following semester grades will be assigned to students:

Grade	<u>Definition</u>	<i>Grade Point Equivalent</i>
A+	90 – 100%	4.00
A	80 – 89%	3.00
B	70 - 79%	2.00
C	60 - 69%	1.00
D	50 – 59%	0.00
F (Fail)	49% and below	

CR (Credit)	Credit for diploma requirements has been awarded.
S	Satisfactory achievement in field /clinical placement or non-graded subject area.
U	Unsatisfactory achievement in field/clinical placement or non-graded subject area.
X	A temporary grade limited to situations with extenuating circumstances giving a student additional time to complete the requirements for a course.
NR	Grade not reported to Registrar's office.
W	Student has withdrawn from the course without academic penalty.

VI. SPECIAL NOTES:

Special Needs:

If you are a student with special needs (e.g. physical limitations, visual impairments, hearing impairments, or learning disabilities), you are encouraged to discuss required accommodations with your professor and/or the Special Needs office. Visit Room E1101 or call Extension 2703 so that support services can be arranged for you.

Retention of Course Outlines:

It is the responsibility of the student to retain all course outlines for possible future use in acquiring advanced standing at other postsecondary institutions.

Communication:

The College considers **WebCT/LMS** as the primary channel of communication for each course. Regularly checking this software platform is critical as it will keep you directly connected with faculty and current course information. Success in this course may be directly related to your willingness to take advantage of the **Learning Management System** communication tool.

Plagiarism:

Students should refer to the definition of “academic dishonesty” in *Student Code of Conduct*. Students who engage in academic dishonesty will receive an automatic failure for that submission and/or such other penalty, up to and including expulsion from the course/program, as may be decided by the professor/dean. In order to protect students from inadvertent plagiarism, to protect the copyright of the material referenced, and to credit the author of the material, it is the policy of the department to employ a documentation format for referencing source material.

Course Outline Amendments:

The professor reserves the right to change the information contained in this course outline depending on the needs of the learner and the availability of resources.

Substitute course information is available in the Registrar's office.

VII. PRIOR LEARNING ASSESSMENT:

Credit for prior learning will be given upon successful completion of a challenge exam or portfolio.

VIII. ADVANCE CREDIT TRANSFER:

Students who wish to apply for advance credit transfer (advanced standing) should obtain an Application for Advance Credit from the program coordinator (or the course coordinator regarding a general education transfer request) or academic assistant. Students will be required to provide an unofficial transcript and course outline related to the course in question.
