

COURSE OUTLINE: SCM104 - LOG OPER METH & SYS

Prepared: Helen Lindfors

Approved: Sherri Smith, Chair, Natural Environment, Business, Design and Culinary

Course Code: Title	SCM104: LOGISTICS OPERATING METHODS AND SYSTEMS
Program Number: Name	2180: SUPPLY CHAIN MANAGEM
Department:	BUSINESS/ACCOUNTING PROGRAMS
Semesters/Terms:	21W, 21S, 20F
Course Description:	The course evaluates the role of efficient logistics and transportation services, and the impact on corporate effectiveness. Topics include: risk management, security, customer service and order fulfillment, distribution operations, purchasing or operation of transportation services, third-party providers and custom documentation.
Total Credits:	3
Hours/Week:	3
Total Hours:	45
Prerequisites:	There are no pre-requisites for this course.
Corequisites:	There are no co-requisites for this course.
Vocational Learning Outcomes (VLO's) addressed in this course:	2180 - SUPPLY CHAIN MANAGEM
Please refer to program web page for a complete listing of program outcomes where applicable.	VLO 2 Determine the value added and financial implications of supply chain decisions and design on overall business profitability, efficiency and stakeholder satisfaction.
	VLO 3 Ensure supply chain activities and transactions are compliant with relevant legal, regulatory and contractual obligations, and industry and organization standards and policies for quality, health, safety, accountability, social and environmental responsibility.
	VLO 4 Use risk mitigation tools and strategies to inform supply chain management decisions.
	VLO 5 Contribute to the acquisition and sale of goods, services and materials in accordance with best practices and public and private sector stakeholder expectations across a variety of industries.
	VLO 6 Contribute to the strategic planning and scheduling of material requirements, resource allocation and inventory for efficient production and fulfillment of customer orders and returns.
	VLO 7 Coordinate the efficient handling and movement of goods, services, materials and related information within and between supply chains.
	Essential Employability Skills (EES) addressed in this course:
Course Evaluation:	Passing Grade: 50%, D

In response to public health requirements pertaining to the COVID19 pandemic, course delivery and assessment traditionally delivered in-class, may occur remotely either in whole or in part in the 2020-2021 academic year.

SAULT COLLEGE | 443 NORTHERN AVENUE | SAULT STE. MARIE, ON P6B 4J3, CANADA | 705-759-2554

A minimum program GPA of 2.0 or higher where program specific standards exist is required for graduation.

Other Course Evaluation & Assessment Requirements:

Learning Activities: Lectures, required readings, seminars, case studies, papers, class discussion and problem-solving, podcasts, videos, content expert presentations

Assignments: All assignments are due on the applicable date at the beginning of class. Assignments are to be submitted via the Learning Management System (LMS).

Late Assignments: Late assignments will not be accepted. There are no make-up (additional) assignments and submission deadlines are adhered to in this course. If you have extenuating circumstances, please advise the Professor.

Missed Tests / Exams: There are no make-up (additional) opportunities for exams or missed tests / quizzes. If you have extenuating circumstances, please advise the Professor.

Books and Required Resources:

Transportation: A Global Supply Chain Perspective by Novack, Gibson, Suzuki and Coyle
 Publisher: Cengage Learning Edition: 9th

Course Outcomes and Learning Objectives:

Course Outcome 1	Learning Objectives for Course Outcome 1
Discuss the role of efficient logistics and transportation services and the impact on corporate effectiveness.	1.1 Understand how transportation affects supply chain management, the price of goods, services and markets 1.2 Explain transportation information requirements and understand the capabilities of transportation software. Articulate the benefits of transportation management systems.
Course Outcome 2	Learning Objectives for Course Outcome 2
Ability to calculate the cost of various freight options and compare financial impact and price accordingly.	2.1 Understand the relationship between a rate and price. 2.2 Familiarity with various types of market structures found in the transportation industry. Understand the different forms of rates used. 2.3 Understand the impact of transportation prices on the relevant market area for a product. 2.4 Calculate the costs of both truckload and less-than-truckload freight moves.
Course Outcome 3	Learning Objectives for Course Outcome 3
To understand and mitigate risks involved in logistics.	3.1 Understand the nature of transportation risk and disruptions 3.2 Describe the process for managing transportation risk and discuss techniques for managing transportation risk.
Course Outcome 4	Learning Objectives for Course Outcome 4
To understand the various freight options, terms involved, and flow of goods and paperwork.	4.1 Gain knowledge of the service characteristics of motor carriers. Understand the impact of fuel and labour on the motor carrier cost structure. 4.2 Discuss the relevance of intermodal and intramodal competition in the railroad industry. Know the major types of commodities hauled by the railroads and discuss the nature of costs and how they impact pricing in the railroad industry. 4.3 Understand the operating and service characteristics of airline transportation, and appreciate the impacts of fuel and
