Developmental Psychology

Course Name

PSY 110-3

Code No.

COURSE DESCRIPTION:

Human psychological development from adolescence to late adulthood, will be studied with an emphasis on the characteristic developmental changes in a person's behaviour, that are a result of the interactive and interdependent effects of maturation and experience. Psychological methodology, research, concepts and theories will be examined in relation to developmental tasks and processes. A continuation of PSY 100-3, Developmental Psychology.

COURSE PHILOSOPHY/GOALS:

This course is designed to develop students' understanding of the concepts, methodologies, theories and processes of normal human psychological development from adolescence through late adulthood. Changes in behaviour throughout the life span, will be interpreted as resulting from the dynamic, interdependent and interactive effects of maturation and experience.

COURSE GOALS:

To study and develop an understanding of:

1. The different philosophical assumptions and theoretical viewpoints regarding the nature of man and his psychological development.
2. The methodologies, research, concepts, theories and determinants of human psychological development.
3. The developmental tasks and processes that characterize each phase of human psychological development throughout the life span.
4. The interactive and interdependent effects of maturation and experience on age related changes in human behavioural development.

COURSE OBJECTIVES:

To be able to critically discuss and demonstrate, through oral and written responses, an understanding of:

1. Characteristic age related changes in human behaviour and psychological processes through the life span.
2. The interactive and interdependent effects of maturation and experience on human psychological development.
