

## COURSE OUTLINE: NRT255 - WILD. SURVEY TECH.

Prepared: Teri Winter/Rob Routledge

Approved: Sherri Smith, Chair, Natural Environment, Business, Design and Culinary

<b>Course Code: Title</b>	NRT255: WILDLIFE SURVEY TECHNIQUES	
<b>Program Number: Name</b>	5214: FISH/WILD CONSERVATN	
<b>Department:</b>	NATURAL RESOURCES PRG	
<b>Semesters/Terms:</b>	21W	
<b>Course Description:</b>	This course builds on the student's understanding of the fundamental principles of sampling and survey design in the context of wildlife surveys. Students will gain experience using a variety of methods to survey wildlife populations with an emphasis not only on data collection but also on the analysis, interpretation, and communication of results.	
<b>Total Credits:</b>	4	
<b>Hours/Week:</b>	4	
<b>Total Hours:</b>	60	
<b>Prerequisites:</b>	There are no pre-requisites for this course.	
<b>Corequisites:</b>	There are no co-requisites for this course.	
<b>Substitutes:</b>	NRT247	
<b>Vocational Learning Outcomes (VLO's) addressed in this course:</b>	<b>5214 - FISH/WILD CONSERVATN</b>	
<b>Please refer to program web page for a complete listing of program outcomes where applicable.</b>	VLO 1 Demonstrate clear, concise and industry appropriate written, spoken and visual communication skills	
	VLO 2 Identify, discuss, organize and assess common flora and fauna species found throughout Ontario, including biological characteristics	
	VLO 3 Demonstrate the ability to follow standardized protocols to collect field data on fish and wildlife populations in a variety of weather and site conditions.	
	VLO 4 Demonstrate the correct use of standard laboratory equipment and skills required to carry out experiments and study various organisms.	
	VLO 5 Start and manage their careers in the Fish and Wildlife Conservation field.	
	VLO 8 Demonstrate an understanding of sustainable development and apply these principles to the natural environment.	
	VLO 9 Safely operate and maintain equipment used in Fish and Wildlife Conservation.	
	VLO 10 Evaluate and apply current technologies and mathematical concepts used to collect, manage and analyze data.	
	VLO 11 Analyze, evaluate and apply subjective and objective safety considerations.	
	<b>Essential Employability Skills (EES) addressed in this course:</b>	EES 1 Communicate clearly, concisely and correctly in the written, spoken, and visual form that fulfills the purpose and meets the needs of the audience.
		EES 2 Respond to written, spoken, or visual messages in a manner that ensures effective communication.

In response to public health requirements pertaining to the COVID19 pandemic, course delivery and assessment traditionally delivered in-class, may occur remotely either in whole or in part in the 2020-2021 academic year.

SAULT COLLEGE | 443 NORTHERN AVENUE | SAULT STE. MARIE, ON P6B 4J3, CANADA | 705-759-2554

- EES 3 Execute mathematical operations accurately.
- EES 4 Apply a systematic approach to solve problems.
- EES 5 Use a variety of thinking skills to anticipate and solve problems.
- EES 6 Locate, select, organize, and document information using appropriate technology and information systems.
- EES 7 Analyze, evaluate, and apply relevant information from a variety of sources.
- EES 9 Interact with others in groups or teams that contribute to effective working relationships and the achievement of goals.
- EES 10 Manage the use of time and other resources to complete projects.
- EES 11 Take responsibility for ones own actions, decisions, and consequences.

**Course Evaluation:**

Passing Grade: 50%, D

A minimum program GPA of 2.0 or higher where program specific standards exist is required for graduation.

**Other Course Evaluation & Assessment Requirements:**

Academic success is directly linked to attendance. Missing more than 1/3 of the course hours in a semester shall result in a F Grade for this Course

Absences during field labs, tests, and other assessments will not be excused without documented personal or health reasons and approved by the instructor. In-class quizzes can not be made up due to absence.

Late assignments will only be accepted within 24 hours past the due date and will be penalized 20% except under extenuating circumstances with appropriate documentation.

Changes to the Course Evaluation scheme may be considered during the semester if approved by the majority of the class (majority = approval by 75% of students present at time of vote).

The instructor cannot guarantee responses to questions in the 24-hour period prior to assignment deadlines and tests via phone message or email.

**Course Outcomes and Learning Objectives:**

Course Outcome 1	Learning Objectives for Course Outcome 1
1. Investigate wildlife population assessment methods and techniques used to measure habitat and food use surveys, applying standard protocols and techniques.	1.1 Describe direct wildlife counting methods (complete counts, incomplete counts, and mark-recapture), indirect wildlife counting methods (indices), and wildlife detection methods (presence/absence). 1.2 Describe common wildlife capture, immobilization, handling, and marking techniques. 1.3 Understand the common role indices play in addressing inventory and monitoring questions and the advantages and disadvantages for their use. 1.4 Demonstrate knowledge of the biases, challenges and advantages / disadvantages of different techniques used to measure wildlife habitat and food use. 1.5 Competently conduct field surveys: a) determine carnivore diet, b) determine use, availability and relative quality of winter deer, elk or moose browse, c) use radio-telemetry equipment to collect location data on VHF-collared elk, d) survey presence and relative abundance of wildlife (e.g., trail cameras, winter

In response to public health requirements pertaining to the COVID19 pandemic, course delivery and assessment traditionally delivered in-class, may occur remotely either in whole or in part in the 2020-2021 academic year.

	track transects, breeding mole salamander searches, nocturnal owl survey or other wildlife surveys), e) identify wildlife tracks and signs (e.g. mammal tracks, gait patterns, scat, and other unique sign, stick nests and the birds or other wildlife that built them) 1.6 Demonstrate ability to analyse, interpret, and communicate field survey results in a technical report.
<b>Course Outcome 2</b>	<b>Learning Objectives for Course Outcome 2</b>
2. Demonstrate knowledge and skills to sex and age wildlife.	2.1 Identify and compare the common techniques used to sex and age wildlife. 2.2 Demonstrate ability to sex and age upland game bird species using biological features (i.e., wings and tails). 2.3 Demonstrate ability to assess age of selected mammals using, e.g., canine pulp cavity and tooth wear.
<b>Course Outcome 3</b>	<b>Learning Objectives for Course Outcome 3</b>
3. Understand the underlying concept of wildlife damage management and describe wildlife damage control techniques.	3.1 Describe the concept of wildlife damage management. 3.2 Identify characteristics to identify wildlife damage/death of livestock. 3.3 Describe common wildlife damage control techniques and evaluate their efficacy. 3.4 Examine case studies in Ontario (e.g., black bear capture and translocation).
<b>Course Outcome 4</b>	<b>Learning Objectives for Course Outcome 4</b>
4. Conduct a literature search and review one or more primary research articles from scholarly journals.	4.1 Differentiate among published forms of science-based literature (e.g., primary, secondary, tertiary and gray literature). 4.2 Demonstrate proficiency in a) developing a clear, organized key word list, b) accessing scientific literature, c) reviewing abstracts for relevance, d) gleaning appropriate information 4.3 Demonstrate the ability to interpret a primary research article by: a) defining the problem that the research proposes to answer and b) describing the process of data collection and explain how the methods employed are used to answer the research objectives.

**Evaluation Process and Grading System:**

Evaluation Type	Evaluation Weight
Assignments, Tests and Quizzes	100%

**Date:**

June 17, 2020

**Addendum:**

Please refer to the course outline addendum on the Learning Management System for further information.

In response to public health requirements pertaining to the COVID19 pandemic, course delivery and assessment traditionally delivered in-class, may occur remotely either in whole or in part in the 2020-2021 academic year.
