### **I. COURSE DESCRIPTION**

The Research Report is intended to consolidate the skills developed in the first 2 years of study, and apply these skills to a hardware and/or software project. The student must demonstrate these skills at the Engineering Technology level through the research, design, construction, verbal and written presentations of their final project. In addition, the student must efficiently implement project management skills.

### **II. TOPICS TO BE COVERED:**

As approved by faculty advisor

### **III. LEARNING OUTCOMES AND ELEMENTS OF PERFORMANCE:**

#### **A. Learning Outcomes:**

1. Research and Prepare a Technical Report
2. Demonstrate proficiency in Project Management
3. Design, Construct and Demonstrate a technical project

**B. Learning Outcomes with Elements of Performance:**

**Upon successful completion of this course, the student will demonstrate the ability to:**

1. Research, document, manage, commission, prototype, construct, test, modify and produce a technical report as required by the selected major project.

**Potential elements of the performance:**

- Successfully complete the design, construction and demonstration of a technical project.
- Accurately document and produce a technical report on the selected project.

**IV. REQUIRED STUDENT RESOURCES:**

- Log Book - A bound book so pages cannot be added or removed

**V. METHODS OF EVALUATION:**

The following Grading System will be used:
