

COURSE OUTLINE: ELR223 - ROBOT/PLC CONTROL SY

Prepared: Ron Chartrand

Approved: Corey Meunier, Chair, Technology and Skilled Trades

Course Code: Title	ELR223: ROBOTIC AND PLC CONTROL SYSTEMS				
Program Number: Name	4026: ELECTRICAL TN-PROC 4029: ELECTRICAL TY-PROCES 4127: ELECTRICAL TN-TRADES				
Department:	ELECT./INSTRUMENTATION PS				
Semesters/Terms:	19W				
Course Description:	This course will introduce the student with classical control fundamentals and reinforce them through robotic and programmable logic controller applications. The student will develop an understanding of PLC in general, the hardware and software associated with Allen Bradley 5000 family PLCs. PLC programming techniques using RS logic 5000 software will be used to design, document and commission basic to intermediate PLC lab assignments. The student will learn how to interface a PLC through HMI to control selected lab equipment as the final Lab Assignment. This course will require the student to work independently and / or in groups during lab times. The student will also be required to work independently on assigned work outside of class time and access information from help files, manuals, and internet as necessary to solve PLC related work problems. This course will prepare the student for basic PLC job related tasks.				
Total Credits:	6				
Hours/Week:	5				
Total Hours:	75				
Prerequisites:	ELR232				
Corequisites:	There are no co-requisites for this course.				
This course is a pre-requisite for:	ELR320, ELR325, ELR326				
Vocational Learning	4029 - ELECTRICAL TY-PROCES				
Outcomes (VLO's) addressed in this course:	VLO 1 Analyze, interpret, and produce electrical and electronics drawings, technical reports including other related documents and graphics.				
Please refer to program web page for a complete listing of program outcomes where applicable.	VLO 8 Use computer skills and tools to solve a range of electrical related problems. VLO 10 Prepare reports and maintain records and documentation systems.				
	VLO 12 Apply and monitor health and safety standards and best practices to workplaces.				
Essential Employability Skills (EES) addressed in this course:	 EES 1 Communicate clearly, concisely and correctly in the written, spoken, and visual form that fulfills the purpose and meets the needs of the audience. EES 2 Respond to written, spoken, or visual messages in a manner that ensures effective communication. 				
	EES 3 Execute mathematical operations accurately.				
	ES 4 Apply a systematic approach to solve problems. ES 5 Use a variety of thinking skills to anticipate and solve problems.				
	LEG 0 030 a variety of triffining skills to articlipate and solve problems.				

SAULT COLLEGE | 443 NORTHERN AVENUE | SAULT STE. MARIE, ON P6B 4J3, CANADA | 705-759-2554

ELR223: ROBOTIC AND PLC CONTROL SYSTEMS

	EES 6 Locate, select, org and information sy	anize, and document information using appropriate technology stems.						
	EES 7 Analyze, evaluate,	e, and apply relevant information from a variety of sources.						
	EES 8 Show respect for tothers.	espect for the diverse opinions, values, belief systems, and contributions of						
		S 9 Interact with others in groups or teams that contribute to effective working relationships and the achievement of goals.						
	EES 10 Manage the use of	Manage the use of time and other resources to complete projects.						
	EES 11 Take responsibility for ones own actions, decisions, and consequences.							
Course Evaluation:	Passing Grade: 50%, D							
Other Course Evaluation & Assessment Requirements:	Grade Definition Grade Point Equivalent A+ 90 - 100% 4.00 A 80 - 89% B 70 - 79% 3.00 C 60 - 69% 2.00 D 50 - 59% 1.00 F (Fail)49% and below 0.00 CR (Credit) Credit for diploma requirements has been awarded. S Satisfactory achievement in field /clinical placement or non-graded subject area.							
	U Unsatisfactory achievement in field/clinical placement or non-graded subject area. X A temporary grade limited to situations with extenuating circumstances giving a student additional time to complete the requirements for a course. NR Grade not reported to Registrar's office. W Student has withdrawn from the course without academic penalty.							
Books and Required Resources:	Technician`s Guide to Programmable Controllers by Terry Borden Richard Cox Publisher: Delmar Edition: sixth ISBN: 978-1-111-54409-6							
Course Outcomes and	Course Outcome 1	Learning Objectives for Course Outcome 1						
Learning Objectives:	Identify basic PLC hardware and software	1.1 State the major advantages of a typical PLC controller over conventional hardware relay systems 1.2 Identify the four major components of a typical PLC and describe the function of each 1.3 Define the term discrete 1.4 Define the term analog 1.5 Identify different types of programming devices 1.6 Describe the I/O section of a PLC 1.7 Define the term interposing relay 1.8 Define the term optical isolation 1.9 Describe how basic AC and DC input and output modules work						
	Course Outcome 2	Learning Objectives for Course Outcome 2						
	2. Develop an understanding of basic PLC ladder logic instructions, numbering systems and	Describe the proper wiring connections for input devices and their corresponding modules Explain why a hard-wire emergency-stop function is desirable						

SAULT COLLEGE | 443 NORTHERN AVENUE | SAULT STE. MARIE, ON P6B 4J3, CANADA | 705-759-2554

ELR223: ROBOTIC AND PLC CONTROL SYSTEMS

Demonstrate hardwiring techniques for AB 5000 PLCs.	2.3 Describe the function of the PLCâ⠬⠢s processor 2.4 Identify the two distinct types of memory 2.5 Explain the term on-line programming 2.6 Understand decimal, binary, hexadecimal, binary coded decimal (BCD) numbering systems 2.7 Identify a hard-wiring diagram 2.8 Understand the Examine ON, OFF, timers, counters move, limits test, sequencers and Internal Storage instructions 2.9 Describe basic programming techniques 2.10 Describe the Force On and Off features and hazards that could be associated with both			
Course Outcome 3	Learning Objectives for Course Outcome 3			
3. Develop and demonstrate basic programming techniques for AB 5000 PLCs using RS Logic software.	a 3.1 Demonstrate the ability to program basic PLC functions offline 3.2 Demonstrate the ability to program PLCs to control 3.3 Demonstrate the ability to hard-wire PLCs to field equipment 3.4 Demonstrate the ability to add documentation to a PLC program			
Course Outcome 4	Learning Objectives for Course Outcome 4			
4. Demonstrate the ability to write basic PLC programs to control various electrical equipment in the lab and run the programs in a PLC in the lab.	4.3 Demonstrate the ability to online edit programs 4.4 Demonstrate the ability to upload a program to a PC from a PLC 4.5 Demonstrate the ability to program basic PLC functions online 4.6 Demonstrate the ability to program PLCs to control Motors, traffic lights, and robot 4.7 Demonstrate the ability to down toad a program to a local PLC and run a program 4.8 Demonstrate the ability to down load a program to a remotely located PLC over the Ethernet network to a particular PLC and run a program			
Course Outcome 5	Learning Objectives for Course Outcome 5			
5. Demonstrate the ability to connect PLCs to control various electrical equipment in the lab and run the programs in a PLC in the lab.	5.1 The ability to hard-wire PLCs to field equipment and I/O cards 5.2 Use available recourses such as internet, manuals, help files, and handbooks to aid in project troubleshooting 5.3 Apply problem-solving techniques and use the knowledge of computer systems and application 5.4 software to resolve technical problems associated with PLC assigned projects. 5.4 Use appropriate application software for programming, communication and troubleshooting projects 5.5 Wire, test and configure automation and control systems that maybe required by the assigned projects to be connected to a PLC such as Lights, Motors Control, traffic lights, and robot 5.6 Apply, install, test and troubleshoot PLC project related equipment, systems and tasks

ELR223: ROBOTIC AND PLC CONTROL SYSTEMS

	Course Outcome 6	Learning Objectives for Course Outcome 6			
	6. Communicate information effectively and accurately by producing electrical PLC related equipment drawings and other related documentation.	6.1 Apply standards and standard symbols in the product drawings 6.2 Use computers and selected tools and equipment to produce or reproduce drawings on CAD 6.3 Use and produce graphics such as single line drawing schematics etc. as necessary to convey technical inform for the associated projects assigned. 6.4 Use available recourses such as internet, manuals, files and handbooks to aid in accurate project document 6.5 Establish and document procedures required to successfully complete assigned projects 6.6 Document all work and produce a complete project in		gs, ation elp ation.	
Evaluation Process and Grading System:	Evaluation Type		Evaluation Weight	Course Outcome Assessed	
	Attendance		5%		
	Lab Demonstration		10%		
	Lab Write-ups		10%		
	Practical Test 1		15%		
	Practical Test 2		25%		
	Test 1 and Take Home Questions		15%		
	Test 2 and Take Home Questions		20%		
Date:	August 22, 2018
