

COURSE OUTLINE: GIS428 - ADV PROGRAMMING GIS

Prepared: Chuck Shannon/Heath Bishop

Approved: Corey Meunier, Chair, Technology and Skilled Trades

Course Code: Title	GIS428: ADVANCED PROGRAMMING FOR GIS
Program Number: Name	4018: GIS-APPLICATION SPEC
Department:	GEOGRAPHIC INFORMATION SYSTEMS
Semesters/Terms:	19W
Course Description:	The power of Geographic Information Systems lays in the automation of repetitive and complex GIS operations to save time, produce consistent results and present clients with usable GIS products and interfaces. Upon successful completion of this course the student will have developed useful Python programming skills which can be applied to the field of GIS and beyond.
Total Credits:	2
Hours/Week:	2
Total Hours:	24
Prerequisites:	GIS401
Corequisites:	There are no co-requisites for this course.
Vocational Learning Outcomes (VLO's) addressed in this course: Please refer to program web page for a complete listing of program outcomes where applicable.	4018 - GIS-APPLICATION SPEC VLO 1 Understand the general concepts of spatial information and the current methodologies used to input, store, manipulate, and retrieve this type of data in a computer based environment; VLO 2 Understand the typical data structures, algorithms, and computational problems that are encountered in various GIS technologies; VLO 5 Be capable of designing and executing, in a progressive manner, algorithms and programs to handle spatial data and associated hardware devices in a programmatic environment of a GIS; VLO 6 Be aware of the issues surrounding the communication of data extracted from a GIS to a variety of potential end users;
Essential Employability Skills (EES) addressed in this course:	EES 1 Communicate clearly, concisely and correctly in the written, spoken, and visual form that fulfills the purpose and meets the needs of the audience. EES 2 Respond to written, spoken, or visual messages in a manner that ensures effective communication. EES 3 Execute mathematical operations accurately. EES 4 Apply a systematic approach to solve problems. EES 5 Use a variety of thinking skills to anticipate and solve problems. EES 6 Locate, select, organize, and document information using appropriate technology and information systems. EES 7 Analyze, evaluate, and apply relevant information from a variety of sources. EES 10 Manage the use of time and other resources to complete projects. EES 11 Take responsibility for ones own actions, decisions, and consequences.

SAULT COLLEGE | 443 NORTHERN AVENUE | SAULT STE. MARIE, ON P6B 4J3, CANADA | 705-759-2554

Course Evaluation:	Passing Grade: 50%, D		
Other Course Evaluation & Assessment Requirements:	Grade Definition Grade Point Equivalent A+ 90 - 100% 4.00 A 80 - 89% B 70 - 79% 3.00 C 60 - 69% 2.00 D 50 - 59% 1.00 F (Fail) 49% and below 0.00 CR (Credit) Credit for diploma requirements has been awarded. S Satisfactory achievement in field /clinical placement or non-graded subject area. U Unsatisfactory achievement in field/clinical placement or non-graded subject area. X A temporary grade limited to situations with extenuating circumstances giving a student additional time to complete the requirements for a course. NR Grade not reported to Registrar’s office. W Student has withdrawn from the course without academic penalty.		
Course Outcomes and Learning Objectives:	Course Outcome 1	Learning Objectives for Course Outcome 1	
	1. Describe key programming concepts.	1.1 Apply appropriate coding standards. 1.2 Describe the concept of what Objects are and how we define them in application development. 1.3 Differentiate between properties, methods and events.	
	Course Outcome 2	Learning Objectives for Course Outcome 2	
	2. Develop ArcMap Add-Ins to expand the functionality of the applications.	2.1 Demonstrate how using VB.Net 2010 and ArcObjects we can build new functionality into the ArcGIS suite of applications. 2.2 Recognize the different type of components we can develop such as command buttons and toolbars.	
	Course Outcome 3	Learning Objectives for Course Outcome 3	
	3. Demonstrate the ability to code using the Python Scripting Language.	3.1 Investigate the Python language syntax. 3.2 Identify the differences between Python and VB.Net. 3.3 Utilize Python with ArcMap using its own ArcPy Editor. 3.4 Utilize Python with PythonWin development environment.	
Evaluation Process and Grading System:	Course Outcome 4	Learning Objectives for Course Outcome 4	
	4. Demonstrate how to use ArcPy library for Python to extend ArcGIS functionality.	4.1 Demonstrate the use of ArcPy to simplify Geoprocessing tasks. 4.2 Demonstrate how to use built in tools with ArcPy. 4.3 Practice using spatial data with ArcPy. 4.4 Practice manipulating spatial data with ArcPy. 4.5 Build Add-Ins using ArcPy.	
	Evaluation Type	Evaluation Weight	Course Outcome Assessed
	Assignments	20%	1-4
	Labs	20%	1-4
	Tests	60%	1-4
Date:	August 22, 2018		

Please refer to the course outline addendum on the Learning Management System for further information.
