Nursing Practical Clinical

NUR 206 AND NUR 226

Course Name

Course Number

CALENDAR DESCRIPTION:

Clinical experience provides the opportunity for the students to apply the knowledge and skills necessary to assist clients who require nursing intervention to regain adaptation. The experience takes place in hospitals and community health care agencies, in mental health, medical surgical, paediatric and maternity facilities.

Clients selected range in age from newborn to old age, and illustrate common physiological and psychosocial health problems.

COMPONENTS OF NURSING PRACTICE COURSE:

1. Community visits
2. Nursing Skills Labs
3. Practice in Health Care Settings (hospitals, community agencies)

PHILOSOPHY/GOALS:

COURSE OBJECTIVES:

1. Demonstrate the use of the nursing process for selected clients who require intervention to regain adaptation.
2. Use adaptation theory as a conceptual basis for nursing practice in assisting clients who require intervention to regain adaptation.
3. Relate in a therapeutic manner in interactions.
4. Respond to an individual or group in a manner reflecting their worth and dignity.
5. Examine willingly own nursing practice in terms of professional standards.
6. Apply criteria for quality health care in current practice situation.
