Course Name

Course Number

PURPOSE OF THE PROGRAM;

This program provides an opportunity for Registered Nurses who have not been recently actively engaged in nursing practice, to upgrade their skills in relation to current College of Nurses' Standards of Nursing Practice. Non-registered nurses may also access this program upon recommendation from the College of Nurses of Ontario.

OVERVIEW OF THE PROGRAM;

The program will contain a total of 240 hours. The theory content will be 90 hours and the lab and clinical experience will be 150 hours.

This course has been developed using the Standards of Nursing practice for Registered Nurses and Registered Nursing Assistants, College of Nurses of Ontario, 1987.

TEXT;

Krozier B., and Erb G.L., Fundamentals of Nursing Concepts and Procedures, 3rd Edition, Wesley Publications, Menlo Park, California, T9T7

Brunner L.S., Textbook of Medical Surgical Nursing, 5th Edition, Suddarth, Lippincott Co., Toronto, 1984

TEACHING/LEARNING METHODS;

Lectures, A.V. resources, class discussions, guest speakers, demonstrations, practice labs, clinical observations, clinical experiences and supervised clinical work, required textbooks and reference books.

Students will need to commit their own time to complete assigned readings and work.

METHOD OF EVALUATION;

Theory

A+ 90-100%
A 80-89%
B 70-79%
C 60-69%

NOTE: A "C" is a pass in Theory.

Clinical

S - Satisfactory
U - Unsatisfactory

NOTE: An "S" is a pass in Clinical

TESTS:

Theory

Test #1 = 30%
Test #2 = 30%
Test #3 = 40%

Total 100%

NOTE: Tests remain the property of Sault College.

Clinical

Students will be evaluated continuously in the clinical area.

NOTE: Successful completion of this program means:

- * 60% overall grade on tests
- * Satisfactory grade in the clinical area
- * Regular attendance to clinical is compulsory to receiving a satisfactory grade.
- * All students registered in this course are subject to policies of Sault College's Nursing Program

OBJECTIVES:

1. The learner will use the nursing process to facilitate optimum adaptation for an individual or group of clients at any point on the health-illness continuum.
2. The learner will perform safely and effectively the nursing skills necessary to meet the needs of patients.
3. The learner will interact in a purposeful and supportive manner with individuals and groups.
4. The learner will demonstrate in nursing practice, a commitment to protect the inherent worth and dignity of man.
5. The learner will practice nursing within the scope of the privileges, responsibilities, ethical and legal obligations of the nursing profession as outlined in the current Standards of Nursing Practice of the College of Nurses of Ontario, 1987 and the Health Disciplines Act.
6. The learner will identify the relationship of the nursing profession to the health care system.
7. The learner will interact with other members of the health care team which may include the supervision and direction of other members of the nursing team.
8. The learner will assume responsibility for continuous personal and professional development.
