COURSE DESCRIPTION

The purpose of this course is to promote the students' critical thinking skills in applying the nursing process in the care of clients of all ages with a chronic and/or terminal illness. Content is organized using examples of selected nursing diagnoses which illustrate nursing interventions integrating knowledge from first and second year Nursing Theory, Biology and Pathophysiology, Sociology and Psychology required to assist the client with a specific chronic and/or terminal illness-

PHILOSOPHY/GOALS:

COURSE OBJECTIVES

1. Demonstrate the use of the nursing process for selected clients and family with a chronic and/or terminal illness.
2. Use adaptation theory as a conceptual basis for nursing practice in assisting clients and their families with a chronic and/or terminal illness.
3. Interact in a therapeutic manner with selected clients and their families with a chronic and/or terminal illness.
4. Respond to an individual, family or group in a manner reflecting their worth and dignity.
5. Examine willingly own nursing practice in terms of professional standards.
6. Apply criteria for quality health care in current practice situations.
7. Seek opportunities for own personal and professional development.
