**I. PHILOSOPHY/GOALS:**

The purpose of this course is to prepare the student to use the nursing process in assisting the client to maintain and promote adaptation. Nursing is viewed within the context of Roy's Adaptation conceptual framework. Emphasis is given to the theory and skills necessary for effective communication in promoting adaptation.

In each of the four modes; Physiological, self-concept, role and interdependence, the norms for various age groups are described, ordinary health problems are presented with health maintenance measures to promote adaptation. Attention is directed toward an understanding to the cultural and health needs of the aging population.

**II. STUDENT PERFORMANCE OBJECTIVES;**

Upon successful completion of this course the student will:

1. define the key concepts of Roy's adaptation model.
2. understand the concept of Nursing Process and its application in the provision of health care.
3. have knowledge of communication theory.
4. recognize responses and stimuli which indicate a client's adaptive status in each of Roy's modes
5. have knowledge of health maintenance measures which promote adaptation.
6. list and describe health measures which promote adaptation through nutrition, sleep & rest, exercise & safety, elimination of skin, bowel, bladder, fluids and electrolytes, oxygen and circulation and the senses
7. develop an awareness of the cultural and religious needs of the individual.
8. have knowledge of the concepts of death and the grieving process.
9. describe the importance of development of self-concept, role function and interdependence in each individual.
10. be familiar with nurse's role in the provision of "wholistic" care.
