

## COURSE OUTLINE: BIO191 - BIOLOGY II

Prepared: Leslie Dafoe

Approved: Bob Chapman, Chair, Health

<b>Course Code: Title</b>	BIO191: BIOLOGY II FOR PADD
<b>Program Number: Name</b>	3065: PRE-HEALTH DIP DGR
<b>Department:</b>	PRE-HEALTH
<b>Semesters/Terms:</b>	21W, 21S
<b>Course Description:</b>	This course will enable the learner to continue to develop a foundation in the fundamental concepts of Biological Sciences and application to the systematic study of the human body. The learner will study and explore the following areas: molecular genetics, human anatomy & physiology for a variety of systems, including the nervous, endocrine, cardiovascular, respiratory, digestive, urinary, reproductive, lymphatic and immune systems, and an introduction to infectious organisms and the processes of infectious diseases. The learner will apply these concepts with a systemic approach to the study of the human body. In the context of the study of the various organ systems, the learner will be introduced to common pathologies with examples taken from current scientific research. The emphasis will be on understanding the underlying concepts and principles, and applying them to a diversity of body systems.
<b>Total Credits:</b>	4
<b>Hours/Week:</b>	4
<b>Total Hours:</b>	60
<b>Prerequisites:</b>	BIO190
<b>Corequisites:</b>	There are no co-requisites for this course.
<b>Vocational Learning Outcomes (VLO's) addressed in this course:</b>	<b>3065 - PRE-HEALTH DIP DGR</b> VLO 1 Examine biological concepts, processes and systems of the human body, including genetics and epigenetics, as well as the structure, function and properties of the molecules of life, cells, tissues and organ systems in relation to homeostasis, physical development and health. VLO 4 Use health sciences and other science-related language and terminology appropriately to communicate clearly, concisely, and correctly in written, spoken, and visual forms. VLO 6 Investigate health sciences and science-related questions, problems and evidence using the scientific method.
<b>Essential Employability Skills (EES) addressed in this course:</b>	EES 1 Communicate clearly, concisely and correctly in the written, spoken, and visual form that fulfills the purpose and meets the needs of the audience. EES 2 Respond to written, spoken, or visual messages in a manner that ensures effective communication. EES 4 Apply a systematic approach to solve problems. EES 5 Use a variety of thinking skills to anticipate and solve problems. EES 6 Locate, select, organize, and document information using appropriate technology

In response to public health requirements pertaining to the COVID19 pandemic, course delivery and assessment traditionally delivered in-class, may occur remotely either in whole or in part in the 2020-2021 academic year.

- and information systems.
- EES 7 Analyze, evaluate, and apply relevant information from a variety of sources.
- EES 8 Show respect for the diverse opinions, values, belief systems, and contributions of others.
- EES 9 Interact with others in groups or teams that contribute to effective working relationships and the achievement of goals.
- EES 10 Manage the use of time and other resources to complete projects.
- EES 11 Take responsibility for ones own actions, decisions, and consequences.

**General Education Themes:** Science and Technology

**Course Evaluation:** Passing Grade: 50%, D

A minimum program GPA of 2.0 or higher where program specific standards exist is required for graduation.

**Books and Required Resources:** Texts from previous semester will be used.

**Course Outcomes and Learning Objectives:**

<b>Course Outcome 1</b>	<b>Learning Objectives for Course Outcome 1</b>
1. The Cardiovascular System.	1.1 Describe the functions of the cardiovascular system. 1.2 Describe the structure and function of the wall of the heart. 1.3 Explain the initiation and conduction of electrical impulses through the heart. 1.4 Follow the sequence of blood flow in the heart. 1.5 Define cardiac output. 1.6 Differentiate between different blood vessels. 1.7 Define blood pressure and the factors that can affect BP. 1.8 Identify major arteries and veins. 1.9 Describe the composition of whole blood and describe the function of the various components.
<b>Course Outcome 2</b>	<b>Learning Objectives for Course Outcome 2</b>
2. The Respiratory System.	2.1 Describe the structure and function of the organs of respiration. 2.2 Describe the role of the respiratory system in maintaining homeostasis. 2.3 Define pulmonary ventilation and lung volumes. 2.4 Explain gas exchange using physical laws.
<b>Course Outcome 3</b>	<b>Learning Objectives for Course Outcome 3</b>
3. The Digestive System.	3.1 Explain the functions of the digestive system. 3.2 Identify the organs and the accessory organs of the gastrointestinal tract . 3.3 Describe the histology of the wall of the GI tract. 3.4 Identify the digestive enzymes and explain their action. 3.5 Explain the regulation of digestion.
<b>Course Outcome 4</b>	<b>Learning Objectives for Course Outcome 4</b>

In response to public health requirements pertaining to the COVID19 pandemic, course delivery and assessment traditionally delivered in-class, may occur remotely either in whole or in part in the 2020-2021 academic year.

SAULT COLLEGE | 443 NORTHERN AVENUE | SAULT STE. MARIE, ON P6B 4J3, CANADA | 705-759-2554

4. The Urinary System.	4.1 Explain the functions of the urinary system. 4.2 Identify the structures of the urinary system. 4.3 Describe the general processes of filtration, reabsorption and secretion. 4.4 Discuss the regulation of the urinary system.
<b>Course Outcome 5</b>	<b>Learning Objectives for Course Outcome 5</b>
5. The Immune System.	5.1 Explain the functions of the lymphatic system. 5.2 Identify the normal flora of the human body. 5.3 Explain immune cell functions. 5.4 Explain innate and adaptive immune responses. 5.5 Discuss antigen presentation.
<b>Course Outcome 6</b>	<b>Learning Objectives for Course Outcome 6</b>
6. The Reproductive System.	6.1 Identify and describe the function of the organs of the male reproductive system. 6.2 Explain spermatogenesis. 6.3 Identify and describe the function of the organs of the female reproductive system. 6.4 Explain oogenesis and hormonal control. 6.5 Describe the female reproductive cycle and birth control.
<b>Course Outcome 7</b>	<b>Learning Objectives for Course Outcome 7</b>
7. Infectious Organisms.	7.1 Describe the basic characteristics of bacteria and identify common examples. 7.2 Describe the basic characteristics of viruses and identify common examples. 7.3 Describe the basic characteristics of parasites and identify common examples. 7.4 Describe the basic characteristics of fungi and identify common examples. 7.5 Discuss the role of infectious organisms in infectious diseases.
<b>Course Outcome 8</b>	<b>Learning Objectives for Course Outcome 8</b>
8. The Nervous System	8.1 Name the divisions of the nervous system and describe their function. 8.2 Identify the types of neurons. 8.3 Identify neuroglia of the PNS and CNS. 8.4 Describe nervous tissue. 8.5 Explain the electrical nerve impulse and synapse. 8.6 Identify the anatomy of the spinal cord.

**Evaluation Process and Grading System:**

<b>Evaluation Type</b>	<b>Evaluation Weight</b>
Final Exam	20%
Midterm Exam	20%
Term Tests 4	60%

**Date:**

December 22, 2020

In response to public health requirements pertaining to the COVID19 pandemic, course delivery and assessment traditionally delivered in-class, may occur remotely either in whole or in part in the 2020-2021 academic year.

SAULT COLLEGE | 443 NORTHERN AVENUE | SAULT STE. MARIE, ON P6B 4J3, CANADA | 705-759-2554

**Addendum:**

Please refer to the course outline addendum on the Learning Management System for further information.
