COURSE DESCRIPTION:

The purpose of this course is to prepare the student to apply the nursing process in the care of clients who require intervention to regain adaptation. This involves the study of physiological and psychosocial stimuli which tend to disrupt the integrity of the individual. Content is organized around examples of selected nursing diagnoses which illustrate nursing assessment and interventions required to assist clients to adapt in common health problem situations.

PHILOSOPHY/GOALS:

COURSE OBJECTIVES:

1. Demonstrate the use of the nursing process for selected clients who require intervention to regain adaptation.
2. Use adaptation theory as a conceptual basis for nursing practice in assisting clients who require intervention to regain adaptation.
3. Interact in a therapeutic manner with selected clients.
4. Respond to an individual or group in a manner reflecting their worth and dignity.
5. Examine willingly own nursing practice in terms of professional standards•
6. Apply criteria for quality health care in current practice situations-
7. Seek opportunities for own personal and professional development.

METHOD OF ASSESSMENT (GRADING METHOD):

EXAM:	#1	DATES	30%
	#2	T.B.A.	30%
