I. COURSE DESCRIPTION:

This practicum course provides the student with an opportunity to care for 4 - 5 consumers in a Health Care Facility. This course takes place in nursing homes. In these settings the students will apply theory they have learned in class. They will practice the role of the Personal Support Worker. They will meet the needs of their elderly consumers using the following principles from first semester: safety, medical asepsis, hygiene, nutrition, therapeutic communications. They will care for consumers with a variety of common disorders and problems and consumers who are involved in rehabilitation and activation. Their assigned consumers may require assistive devices and the use of oxygen therapy. Their assigned consumers may have a mental illness or exhibit symptoms of cognitive impairments. They will care for consumers and their families who are experiencing a terminal illness and are dying. They will be assessing consumers for signs of abuse and will report their concerns to the proper person.

II. LEARNING OUTCOMES:

Upon successful completing of this course the student will have the ability to:

1. Demonstrate that they have maintained the skills and behaviours performed last semester in PSW 105 Practicum A. (Please refer to this document for the learning outcomes still expected of the student.)
2. Demonstrate the ability to care for consumers requiring rehabilitation and the use of assistive devices and equipment.
3. Encourage and assist consumers to actively take part in their own care.
4. Safely care for a consumer requiring oxygen.
5. Use special measures identified in class to care for consumers who are cognitively impaired and /or have a psychosocial condition, and/or have challenging behaviours.
6. Identify and safely care for consumers who require restraints.
7. Care for a consumer and his/her family who have a terminal illness and are dying by using measures identified in class.
8. Safely assist consumer to take their medications and be able to identify the common drug side effects and drug classifications.
9. Observe consumer for common drug side effects.
