mechanisms of infection, and tumor biology.

Demonstrate knowledge of the pathophysiology of common diseases and injury by describing functional alterations within body systems.

Use pathophysiology terminology to communicate clients' health status.

Describe the pathophysiology underlying client conditions and the associated clinical manifestations.

Integration of content from BSCN 2107 and previous and current nursing and science courses will demonstrate how nurses use knowledge of pathophysiology to understand clinical manifestations, disease progression, guide client care and inform nursing judgement.
