Ends in View	Process
This course will provide an opportunity for learners to enhance their ability to make connections between nursing practice, theory, and research. Learners will acquire knowledge about a range of research techniques and methods associated with the positivist and constructivist paradigms. Learners will participate as research consumers through reading and reviewing nursing research studies and engaging in learning activities to develop skills for critically examining the research process and products.	
Ends in View	Process
The learning activities of BSCN 3416 are aimed at further development of research praxis critical in promoting ethical and evidence-informed clinical practice. Learners will use their critical thinking skills to understand, review, and appraise quantitative and quantitative research approaches and methods in nursing. The learning activities focus on the examination and application of research methods. Active participation in the learning activities will assist in te
