

COURSE OUTLINE: MTH612 - MATHEMATICS

Prepared: Mathematics Department

Approved: Sherri Smith, Chair, Natural Environment, Business, Design and Culinary

Course Code: Title	MTH612: MATHEMATICS												
Program Number: Name	4061: AVIATION TECHNOLOGY												
Department:	MATHEMATICS												
Semesters/Terms:	18F												
Course Description:	Students will develop skills needed to solve problems in technical mathematics. Topics include a detailed review of algebra followed by a study of quadratic equations, exponential and logarithmic functions and trigonometric functions.												
Total Credits:	4												
Hours/Week:	4												
Total Hours:	60												
Prerequisites:	There are no pre-requisites for this course.												
Corequisites:	There are no co-requisites for this course.												
Substitutes:	MTH143												
This course is a pre-requisite for:	AFT120, AVF122, AVT123, ELR104, MTH613												
Essential Employability Skills (EES) addressed in this course:	EES 3 Execute mathematical operations accurately. EES 4 Apply a systematic approach to solve problems. EES 5 Use a variety of thinking skills to anticipate and solve problems.												
Course Evaluation:	Passing Grade: 50%, D												
Books and Required Resources:	Basic Technical Calculus with Analytic Geometry by A. J. Washington Publisher: Pearson Edition: 10												
Course Outcomes and Learning Objectives:	<table border="1"> <thead> <tr> <th>Course Outcome 1</th> <th>Learning Objectives for Course Outcome 1</th> </tr> </thead> <tbody> <tr> <td>1. Functions:</td> <td>1.1 Distinguish a function from other mathematical expressions or equations. 1.2 Make a graph of some common families of functions.</td> </tr> <tr> <th>Course Outcome 2</th> <th>Learning Objectives for Course Outcome 2</th> </tr> <tr> <td>2. Trigonometric Functions:</td> <td>2.1 Convert decimal degrees to degrees, minutes, seconds, and also to revolutions. 2.2 Define six trigonometric ratios and calculate ratios and angles involving right triangles.</td> </tr> <tr> <th>Course Outcome 3</th> <th>Learning Objectives for Course Outcome 3</th> </tr> <tr> <td>3. Systems of Linear Equations:</td> <td>3.1 Solve systems of two linear equations graphically. 3.2 Solve systems of two linear equations by elimination.</td> </tr> </tbody> </table>	Course Outcome 1	Learning Objectives for Course Outcome 1	1. Functions:	1.1 Distinguish a function from other mathematical expressions or equations. 1.2 Make a graph of some common families of functions.	Course Outcome 2	Learning Objectives for Course Outcome 2	2. Trigonometric Functions:	2.1 Convert decimal degrees to degrees, minutes, seconds, and also to revolutions. 2.2 Define six trigonometric ratios and calculate ratios and angles involving right triangles.	Course Outcome 3	Learning Objectives for Course Outcome 3	3. Systems of Linear Equations:	3.1 Solve systems of two linear equations graphically. 3.2 Solve systems of two linear equations by elimination.
	Course Outcome 1	Learning Objectives for Course Outcome 1											
	1. Functions:	1.1 Distinguish a function from other mathematical expressions or equations. 1.2 Make a graph of some common families of functions.											
	Course Outcome 2	Learning Objectives for Course Outcome 2											
2. Trigonometric Functions:	2.1 Convert decimal degrees to degrees, minutes, seconds, and also to revolutions. 2.2 Define six trigonometric ratios and calculate ratios and angles involving right triangles.												
Course Outcome 3	Learning Objectives for Course Outcome 3												
3. Systems of Linear Equations:	3.1 Solve systems of two linear equations graphically. 3.2 Solve systems of two linear equations by elimination.												

	<p>3.3 Solve systems of two linear equations by comparison.</p> <p>3.4 Solve systems of two or three linear equations using determinants.</p> <p>3.5 Solve word problems involving linear equations with two or three variables.</p>
Course Outcome 4	Learning Objectives for Course Outcome 4
4. Factoring and Fractions:	<p>4.1 Use factoring methods of common factoring, difference of squares, trinomials and sum and difference of cubes factoring.</p> <p>4.2 Add, subtract, multiply and divide algebraic fractions.</p> <p>4.3 Solve fractional equations.</p>
Course Outcome 5	Learning Objectives for Course Outcome 5
5. Quadratic Equations:	<p>5.1 Solve quadratic equations using the methods of factoring, the square root method, completing the square and the quadratic formula.</p> <p>5.2 Graph quadratic functions by finding the vertex and the x and y intercepts.</p>
Course Outcome 6	Learning Objectives for Course Outcome 6
6. Trigonometric Functions of any Angle:	<p>6.1 Understand and use the CAST rule.</p> <p>6.2 Use trigonometry to solve problems involving angles in any quadrant.</p> <p>6.3 Explain what a radian is and convert degrees to radians and vice-versa.</p> <p>6.4 Solve problems involving angles in radian measure.</p>
Course Outcome 7	Learning Objectives for Course Outcome 7
7. Vectors and Oblique Triangles:	<p>7.1 Add and subtract vectors graphically and identify the component and resultant vectors.</p> <p>7.2 Add and subtract vectors algebraically using a vector chart.</p> <p>7.3 Solve problems involving right triangles and vectors.</p> <p>7.4 Use the sine and cosine law to solve problems involving oblique triangles.</p>
Course Outcome 8	Learning Objectives for Course Outcome 8
8. Graphs of Trigonometric Functions:	<p>8.1 Determine the amplitude, period and phase shift of a given trig function.</p> <p>8.2 Make a sketch of any of the six trig functions studied. Include two periods.</p>
Course Outcome 9	Learning Objectives for Course Outcome 9
9. Exponents and Radicals:	<p>9.1 Study and apply the rules of exponents and simplify algebraic expressions involving exponents.</p> <p>9.2 Write exponential expressions in radical form and vice-versa.</p> <p>9.3 Perform algebraic operations on radical expressions including the conjugate radical.</p>
Course Outcome 10	Learning Objectives for Course Outcome 10
10. Exponential and Logarithmic Functions:	<p>10.1 Study and apply the properties of logarithms by expanding and simplifying logarithmic</p>

	expressions. 10.2 Solve logarithmic and exponential equations.
Course Outcome 11	Learning Objectives for Course Outcome 11
11. Additional Types of Systems of Equations:	11.1 Recognize equation forms of circles, parabolas, ellipses and hyperbolas. 11.2 Solve systems of equations of first and second degree.
Course Outcome 12	Learning Objectives for Course Outcome 12
12. Inequalities:	12.1 Solve problems involving linear and non-linear inequalities. Draw a number line to show the solution. Use a factor chart for equations of second degree and higher.
Course Outcome 13	Learning Objectives for Course Outcome 13
13. Variation:	13.1 Define the terms ratio and proportion. 13.2 Reduce a ratio to lowest terms. 13.3 Solve ratio and proportion problems. 13.4 Write equations indicating direct, joint and inverse variation. 13.5 Solve word problems involving variation.

Evaluation Process and Grading System:

Evaluation Type	Evaluation Weight	Course Outcome Assessed
Test 1	25%	all
Test 2	25%	all
Test 3	25%	all
Test 4	25%	all

Date:

June 25, 2018

Please refer to the course outline addendum on the Learning Management System for further information.
