

I. COURSE DESCRIPTION: This course builds on the student's algebra skills and applies these skills in the context of business, life, and social sciences. The topics of study include equations and inequalities, analysis of polynomial, rational, exponential, and logarithmic functions, systems of equations and inequalities, matrices, mathematics of finance, and introductory probability theory.

II. TOPICS:

1. Graphs, Equations, and Inequalities – 10 hours
2. Polynomials and Rational Functions – 11 hours
3. Exponential and Logarithmic Functions – 8 hours
4. Mathematics of Finance – 8 hours
5. Systems of Linear Equations and Matrices – 9 hours
6. Sets and Probability – 14 hours

III. LEARNING ACTIVITIES:

1.0	Graphs, Equations, and Inequalities	Pages	Exercises
1.1	Graphs	pp. 66 – 73	2.1 pp. 73 - 76
1.2	Equations of lines	pp. 76 – 85	2.2 pp. 86 – 89
1.3	Linear models	pp. 89 – 96	2.3 pp. 96 – 100
1.4	Quadratic equations	pp. 50 – 57	1.7 pp. 58 – 59
1.5	Linear inequalities	pp. 100 - 105	2.4 pp. 106 – 107
1.6	Polynomials and rational inequalities	pp.108 – 113	2.5 pp. 113 - 114
2.0	Polynomials and Rational Functions		
2.1	Functions	pp. 120-126	3.1 pp. 126 – 128
2.2	Graphs of functions	pp. 128 – 137	3.2 pp. 137 – 141
2.3	Applications of linear functions	pp. 141 – 148	3.3 148 – 151
2.4	Quadratic functions	pp. 152 – 158	3.4 pp. 158 – 159
2.5	Applications of quadratic functions	pp. 159 – 164	3.5 pp. 165 - 167
2.6	Polynomial functions	pp. 168 – 174	3.6 pp. 175 – 177
2.7	Rational functions	pp. 177 – 185	3.7 pp. 185 – 187
3.0	Exponential and Logarithmic Functions		
3.1	Exponential functions	pp. 192 – 196	4.1 pp. 197 – 199
3.2	Applications of exponential functions	pp. 199 – 203	4.2 pp. 203 – 206
3.3	Logarithmic functions	pp. 207 – 213	4.3 pp. 213 – 215
3.4	Logarithmic and exponential functions	pp. 215 – 222	4.4 pp. 222 – 225
4.0	Mathematics of Finance		
4.1	Simple interest and discount	pp. 213 – 236	5.1 pp. 236 – 237
4.2	Compound interest	pp. 238 – 246	5.2 p. 246 – 248
4.3	Future value of an annuity and sinking funds	pp. 249 – 257	5.3 pp. 257 – 259
4.4	Present value of an annuity and amortization	pp. 259 – 265	5.3 pp. 265 – 267

III. LEARNING ACTIVITIES:

5.0	Systems of Linear Equations	Pages	Exercises
5.1	Systems of linear equations	pp. 275 – 287	6.1 pp. 287 – 291
5.2	The Gauss-Jordan Method	pp. 2291 – 298	6.2 pp. 299 – 301
5.3	Basic matrix operations	pp. 302 – 308	6.3 pp. 208 – 310
5.4	Matrix products and inverses	pp. 310 – 321	6.4 p. 321 – 324
5.5	Applications of matrices	pp. 324 – 331	6.5 pp. 332 - 335
6.0	Sets and Probability		
6.1	Sets	pp. 415 – 422	8.1 pp. 422 – 424
6.2	Applications of Venn diagrams	pp. 424 – 430	8.2 pp. 431 – 433
6.3	Introduction to probability	pp. 433 – 439	8.4 pp. 439 – 441
6.4	Basic concepts of probability	pp. 441 – 447	8.5 pp. 447 – 451
6.5	Conditional probability and independent events	pp. 451 – 461	8.5 pp. 462 – 465
6.6	Permutations and combinations	pp. 481 – 491	9.1 pp. 492 – 495
6.7	Applications of counting	pp. 495 – 501	9.2 pp. 501 – 503
6.8	Markov chains	pp. 522 – 530	9.5 pp. 531 - 534

IV. REQUIRED RESOURCES/TEXTS/MATERIALS:

1. Mathematics with Applications, 8th Edition, Lial and Hungerford, Addison and Wesley Publishers
2. Calculator: SHARP Scientific Calculator EL-531G. *The use of some kinds of calculators may be restricted during tests.*

VI. EVALUATION PROCESS/GRADING SYSTEM:

MAJOR ASSIGNMENTS AND TESTS

Regular topic tests will contribute a minimum of **60%** of the overall mark.

While regular tests will normally be scheduled and announced beforehand, there may be an unannounced test on current work at any time. Such tests, at the discretion of the instructor, may be used for up to **30%** of the overall mark.

The instructor will provide you with a list of test dates and other required evaluation information for your class section. Tests may be scheduled out of regular class time.

ATTENDANCE

It is your responsibility to attend all classes during the semester. Research indicates there is a high correlation between attendance and student success.

If you are absent from class, it is your responsibility to find out what work was covered and assigned and to complete this work before the next class. Your absence indicates your acceptance of this responsibility.

VI. EVALUATION PROCESS/GRADING SYSTEM (continued):

Unexcused absence from a test may result in a mark of zero (“0”). Absence may be excused on compassionate grounds such as verified illness or bereavement. On return from an excused absence, you should ask your instructor to schedule the writing of a make-up test. Failure to do so will be considered as an unexcused absence.

METHOD OF ASSESSMENT (GRADING METHOD)

<u>Grade</u>	<u>Definition</u>	<u>Grade Point Equivalent</u>
A+ Consistently outstanding	90% - 100%	4.00
A Outstanding achievement	80% - 89%	3.75
B Consistently above average achievement	70% - 79%	3.00
C Satisfactory or acceptable achievement in all areas subject to assessment	60% - 69%	2.00
R Repeat - The student has not achieved the objectives of the course, and the course must be repeated.	Less than 60%	0.00
X A temporary grade, limited to situations with extenuating circumstances, giving a student additional time to complete course requirements (See Below)		

CR Credit exemption available.

The method of calculating your weighted average will be defined by your instructor. Since grades are based upon averages, it follows that good marks in some tests can compensate for a failing mark in another test.

Make-Up Test (if applicable)

An “X” grade may be assigned at the end of the regular semester if you have met **ALL** of the following criteria for the course:

- an overall average between 50% and 59% was achieved
- at least 50% of the tests were passed
- at least 80% of the scheduled classes were attended
- at least 80% of quizzes and assignments were submitted
- all of the topic tests were written

If you are assigned an “X” grade, you may convert it to a “C” grade by writing a make-up test on topics agreed to by the instructor. This test will be available at the time agreed to by your instructor.

VI. EVALUATION PROCESS/GRADING SYSTEM (continued):

At the end of the regular term, it is your responsibility to obtain your results from your instructor and, in the event of an "X" grade, to inquire when the make-up test will be available.

The score you receive on this make-up test will replace your original test score and be used to re-calculate your weighted average. If the re-calculated average is 60% or greater, a "C" grade will be assigned. If the re-calculated average is 59% or less, an "R" grade will be assigned.

"R" and "X" Grades at the end of the Semester

If an "X" grade is not cleared by the specified date, it will become an "R" grade. Except for extenuating circumstances, an "X" grade in Math will not be carried into the next semester.

"R" Grades during the Semester

A student with a failing grade and poor attendance (less than 80% attendance) may be given an "R" at any time during the semester.

VII. SPECIAL NOTES:

Special Needs

Students with special needs (e.g. physical limitations, visual impairments, hearing impairments, learning disabilities), are encouraged to discuss required accommodations with the professor and/or contact the Special Needs Office.

Advanced Standing

Students who have completed an equivalent post-secondary course must bring relevant documents to the Coordinator, Mathematics Department.

Retention of Course Outlines

It is the responsibility of the student to retain all course outlines for possible future use in gaining advanced standing at other post-secondary institutions.

Substitute course information is available at the Registrar's office.

The instructor reserves the right to alter the course as he/she deems necessary to meet the needs of the students.

VIII. PRIOR LEARNING ASSESSMENT:

Students who wish to apply for advanced credit in the course should consult the instructor or the Prior Learning Assessment Office (E1306).
