

# COURSE OUTLINE

## MPF103

1

Prepared: George Parsons    Approved: Corey Meunier

<b>Course Code: Title</b>	MPF103: WORK PRACTICES
<b>Program Number: Name</b>	4044: MOT POWER ADV REPAIR
<b>Department:</b>	MOTIVE POWER
<b>Semester/Term:</b>	17F
<b>Course Description:</b>	Upon successful completion of this course, you will be able to describe the legal responsibilities of employees and employers relating to safe work practices, protection of the environment, and operation of lifting rigging, and blocking equipment according to government safety and environmental legislation, be able to use precision measuring tools, be able to perform fastening device installation and removal procedures, be able to describe the repair procedures for bearings, seals, and sealants, be able to identify and perform proper cleaning methods, be able to select and use proper hand tools including electric and pneumatic tools and be able to identify and perform proper lifting techniques using powered lift trucks and all in accordance to and following manufacturers` recommended procedures, government regulations and safe work practices.
<b>Total Credits:</b>	6
<b>Hours/Week:</b>	12
<b>Total Hours:</b>	84
<b>This course is a pre-requisite for:</b>	MPF120, MPF121, MPF122, MPF123, MPF124, MPF126, MPF127, MPF129, MPF130, MPT200, MPT201, MPT202, MPT203, MPT204, MPT230, MPT231, MPT232, MPT233, MPT234, MPT235
<b>Vocational Learning Outcomes (VLO's):</b>  Please refer to program web page for a complete listing of program outcomes where applicable.	#4. Diagnose and repair electrical, electronic, personal safety, and emission components and systems in compliance with manufacturer's recommendations. #7. Disassemble and assemble components to required specifications by applying workshop skills and knowledge of basic shop practices. #10. Communicate information effectively, credibly, and accurately by producing supporting documentation to appropriate standards. #11. Use information technology and computer skills to support work in a motive power environment.
<b>Essential Employability Skills (EES):</b>	#1. Communicate clearly, concisely and correctly in the written, spoken, and visual form that fulfills the purpose and meets the needs of the audience. #2. Respond to written, spoken, or visual messages in a manner that ensures effective

- communication.
- #3. Execute mathematical operations accurately.
  - #4. Apply a systematic approach to solve problems.
  - #5. Use a variety of thinking skills to anticipate and solve problems.
  - #6. Locate, select, organize, and document information using appropriate technology and information systems.
  - #7. Analyze, evaluate, and apply relevant information from a variety of sources.
  - #8. Show respect for the diverse opinions, values, belief systems, and contributions of others.
  - #9. Interact with others in groups or teams that contribute to effective working relationships and the achievement of goals.
  - #10. Manage the use of time and other resources to complete projects.
  - #11. Take responsibility for ones own actions, decisions, and consequences.

### Course Evaluation:

Passing Grade: 50%, D

### Other Course Evaluation & Assessment Requirements:

The following semester grades will be assigned to students:

Grade  
Definition Grade Point Equivalent  
A+ 90 100% 4.00  
A 80 89%  
B 70 - 79% 3.00  
C 60 - 69% 2.00  
D 50 59% 1.00  
F (Fail) 49% and below 0.00

CR (Credit) Credit for diploma requirements has been awarded.  
S Satisfactory achievement in field /clinical placement or non-graded subject area.  
U Unsatisfactory achievement in field/clinical placement or non-graded subject area.  
X A temporary grade limited to situations with extenuating circumstances giving a student additional time to complete the requirements for a course.  
NR Grade not reported to Registrar's office.  
W Student has withdrawn from the course without academic penalty.

### Evaluation Process and Grading System:

Evaluation Type	Evaluation Weight
Assignments/Theory	10%
Shop/Assigned/Tasks	50%
Tests/Theory	40%

## MPF103

3

Prepared: George Parsons    Approved: Corey Meunier

### Books and Required Resources:

Heavy Duty Truck Systems by Bennett  
Publisher: Cengage Learning Edition: 6th

Automotive Technology a Systems Approach by Restoule  
Publisher: Nelson Education Edition: 3rd Canadian

### Course Outcomes and Learning Objectives:

#### Course Outcome 1.

Upon successful completion of this course, the student will demonstrate the ability to:  
Use the correct safety and environmental practices associated in an automotive shop.

#### Learning Objectives 1.

- List the safety equipment required to operate a motive power shop
- Describe the potential dangers associated with in the motive power repair industry
- Describe the rights and responsibilities of the employer and employees under the Occupational Health and Safety Act. (OHSA).
- Outline the proper procedures to defuse potentially hazardous situations in the work place
- Exhibit knowledge and understanding of the WHMIS Safety Act
- Demonstrate proper use of cleaning equipment
- Explain the laws and proper handling of air conditioning refrigerants
- Fire Safety
- Proper Personal Protective Safety Equipment
- Outline Hybrid safety guidelines and precautions
- Be able to identify potential safety hazards in a motive power environment:
  - electrical hazards
  - proper ventilation
  - glove requirements
  - slipping hazards
  - tripping hazards
  - lifting techniques
  - eye hazards
  - hearing hazards
  - rings and jewelry

#### Course Outcome 2.

# COURSE OUTLINE

## MPF103

4

Prepared: George Parsons    Approved: Corey Meunier

Demonstrate the use of proper jacking and lifting equipment used in the motive power industry.

### Learning Objectives 2.

Demonstrate the proper method of raising and lowering vehicles using hoists, fork lifts, jacks, blocking and safety stands.

- Use safety stands and jacks
- Perform vehicle placement and movement
- Find the lifting points
- Outline equipment maintenance
- State lifting capacities of hoisting equipment
- Use adaptors & extensions
- Describe types of hoists and lifting equipment
- Operate safety locks and releases
- Position vehicle / wheel chocks
- Check overhead environment
- Verify correct engagement of lift points
- Verify balance
- Verify correct use of safety locks

### Course Outcome 3.

Identify and safely use hand and power tools common to the motive power industry.

### Learning Objectives 3.

Perform the following metal working operations:

- verify thread strengths and torque requirements for wet and dry
- repair damaged threads
- free seized threads, remove broken studs / cap screws
- install helicoils and keenserts
- apply thread locker and anti-seize
  - perform metal working tasks related to
- drilling
- tapping
- hack sawing
- filing

# COURSE OUTLINE

## MPF103

5

Prepared: George Parsons    Approved: Corey Meunier

- Identify hand and power tools used the repair of motive power vehicles and equipment.
- Perform component removal and installation using proper tools.

### **Course Outcome 4.**

Define the purpose and fundamentals of fasteners and tightening procedures

### **Learning Objectives 4.**

- identify fastener grades and applications
- demonstrate the ability to identify SAE vrs SI
- explain tensile, yield, shear strength and how they differ
- choose the proper grade pitch threads per inch for the job being performed
- explain the factors that affect torque such as thread condition, lubrication, temperature and fastener composition

### **Course Outcome 5.**

Demonstrate a working knowledge of the purpose, construction, principals of operation, and calibration of precision and non-precision measuring tools

### **Learning Objectives 5.**

- metric and imperial measurements and conversions
- demonstrate use of micrometers (inside and outside)
- use small hole gauges, calipers. Verniers and telescoping gauges
- measure brake drums with metric and imperial drum gauges
- apply torque wrenches to the trade (click, dial, and beam)

### **Course Outcome 6.**

Upon successful completion, the student will be able to operate heating and cutting equipment following manufacturers` recommendations, government regulations, and safe work practices.

# COURSE OUTLINE

## MPF103

6

Prepared: George Parsons    Approved: Corey Meunier

### Learning Objectives 6.

- oxy-fuel gases
- eye, face, hand, foot, and clothing protection
- set-up, ignition, and shutdown sequence
- cylinder handling/storage
- fire prevention
- combustible material (eg. Butane lighter risks)
- flashback
- backfire
- removing damaged or broken fasteners
- using heat to free seized fasteners
- cylinders
- identification features
- pressure regulator
- manual valves
- gauges and hoses
- cutting attachments
- tips
- cutting metals
- heating
- torch body
- heating tips
- flashback arresters
- equipment set-up, ignition, and shutdown sequence
  - oxygen and acetylene pressure settings
  - ignition procedures
  - select heating and cutting tips
  - observe tip angle, travel speed, and gap
  - demonstrate awareness of potential damage from heating or cutting to surrounding materials
  - identify potential risks for altering metallurgical properties
  - perform appropriate pressure settings, ignition, and flame adjustments for specific heating and cutting tasks
  - remove damaged fasteners
  - heating and removing procedures of seized fasteners

### Course Outcome 7.

# COURSE OUTLINE

## MPF103

7

Prepared: George Parsons    Approved: Corey Meunier

Identify various types and styles of equipment utilized in the Motive Power Industry.

### Learning Objectives 7.

- Complete assigned project

**Date:**

Friday, September 1, 2017

Please refer to the course outline addendum on the Learning Management System for further information.
